-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of species 2 in the reply filed on 13 August 2007 is acknowledged. The traversal is on the ground(s) that there is a "special technical feature" shared by all the claims. This is not found persuasive because for example claim 12 does not require the same features as claims 2 or 3.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 2, 3, 6-11, and 14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant is strongly advised not to file any divisional applications until prosecution of this pending application is concluded, as any claims dependent from generic or linking claims will be examined when the generic or linking claims are deemed allowable.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 15 recites the limitation "the correction means" in line 2. There is insufficient antecedent basis for this limitation in the claim. Claims 1 and 12 do not limit the correction means, this is first found in claim 13.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 4, 5 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nisimura, 3,953,942. Please refer to figures 3 and 4, and to column 6, lines 2-39.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3723

9. Claims 5, 13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nisimura, 3,953,942, in view of Kanda et al, 5,683,290. '942 does not expressly disclose that the grinding tool includes a metal in its bonding material, or correction means for correcting the machining surface, functioning simultaneously with the machining of the workpiece. In a similar apparatus, '290 teaches using a metal bonded grinding tool, and correcting the grinding surface with correction means comprising a rotary shaping wheel, simultaneously with machining the workpiece. Using the known techniques of grinding with a metal bonded wheel, and correcting the surface of the wheel during machining of the workpiece, to provide the predictable result of maintaining the desired grinding wheel contour as taught by '290 would have been obvious to one of ordinary skill in the art. KSR International Co. v. Teleflex Inc.; 550 U.S.---, 82 USPQ2d 1385 (2007).

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar devices are cited of interest.
